

Savvion

Savvion, one of this year's ITxpo solution providers, is a business process trailblazer that moves enterprises beyond ordinary BPM with groundbreaking business-critical software, solutions and services that make them more competitive and cost-efficient. The world's top-performing companies, including 22 of the Fortune 100, choose Savvion to operate more productively and profitably. Visit them in booth 1704 on the ITxpo show floor, or visit their web site at www.savvion.com.

What are they showcasing?

Savvion is showcasing industry-leading Business Process Management software that enables enterprises of all sizes to achieve significant business performance improvement with high ROI and low TCO. Savvion offers software for:

- Business Process Analysis (BPA) – Model, Analyze, Simulate, Document and optimize business processes.
- Business Process Management System (BPMS) – Create process based business solutions for your broken processes with quick time to deployment, quick ROI and low TCO.
- Business Process Improvement (BPI) – Offers business users tools to create business metrics, perform analytics, monitor and improve the process.

In addition, Savvion also offers solutions such as Case Management and Supply Chain management, and vertical solutions including in Telecommunications, Banking and Life sciences.

What business problem do they solve?

BusinessManager™, Savvion's comprehensive BPMS, offers an easy-to-use interface for business people built upon enterprise-class deployment and management capabilities required by corporate IT. With BusinessManager, business users and project teams define and share current processes, collaborate on process improvements and rapidly deploy solutions.

Who are their key customers?

More than 350 of the world's top-performing companies, including 24 of the Fortune 100, choose Savvion to operate more productively and profitably.
